

Team ID	PNT2022TMID25734
Project Name	Skill/Job Recommended Application

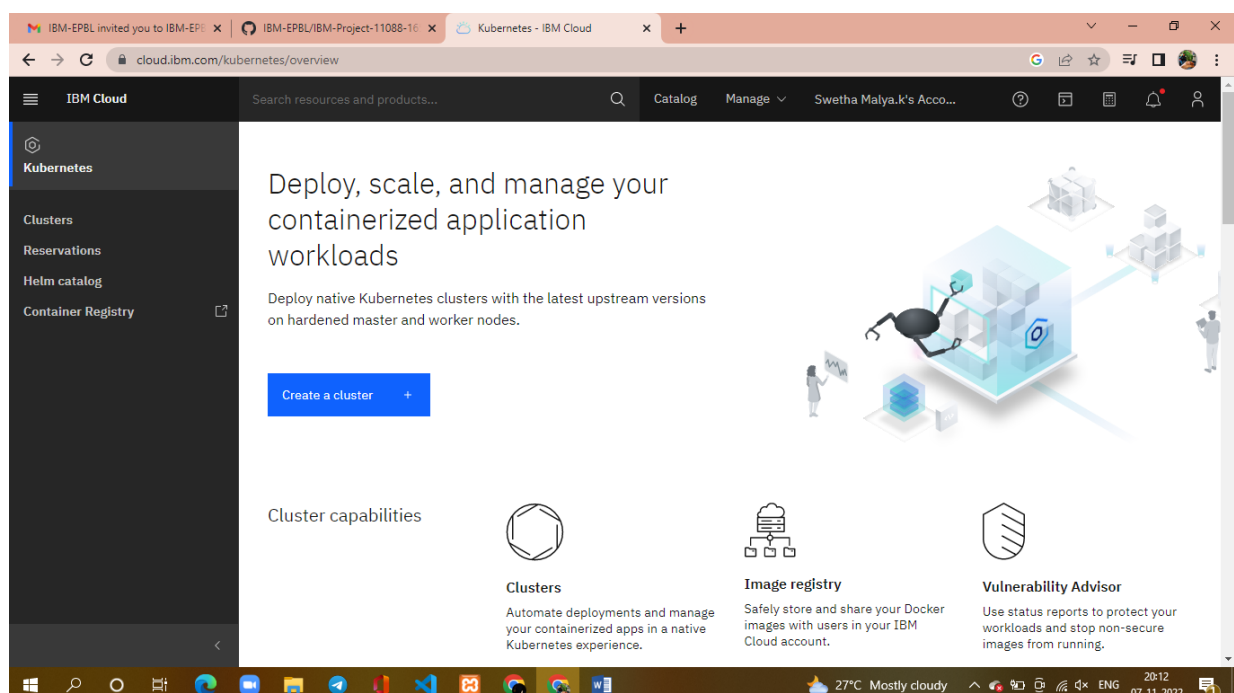

Steps

Create a Kubernetes cluster

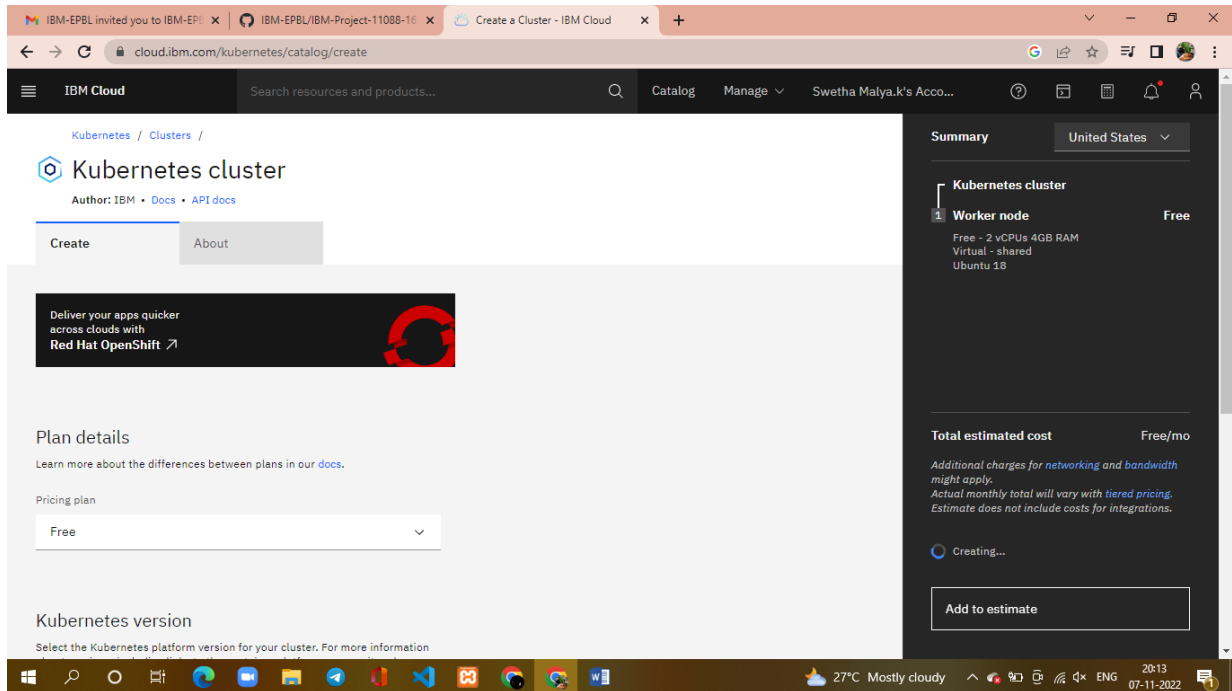

- Sign in to your [IBM Cloud Dashboard](#).
- Open **IBM Kubernetes Service**.

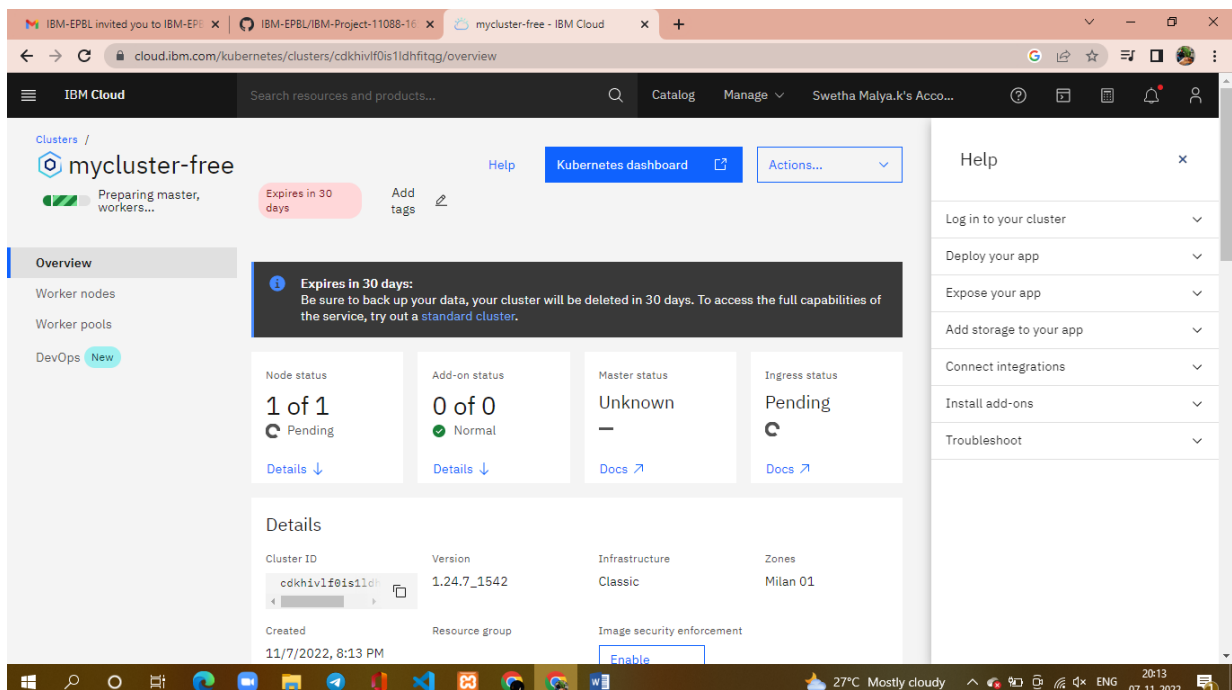

- Click **Create Cluster**.

- Select the **Region** where you want to deploy the cluster, type in a **name** for your cluster, then click **Create Cluster**.
- Select the appropriate cluster type depending on your account.
- It takes some time for the cluster to get ready (around 30 minutes).

- Once the cluster is ready, click on your cluster's name and you will be redirected to a new page with information about your cluster and worker node.

- Click on the **Worker Nodes** tab to note the cluster's Public IP.

The screenshot shows the IBM Cloud Kubernetes dashboard. The main heading is 'mycluster-free' with a status indicator 'Preparing master, workers...' and a red banner 'Expires in 30 days'. The left sidebar has tabs for 'Overview', 'Worker nodes' (selected), 'Worker pools', and 'DevOps'. The 'Worker nodes' tab displays a table with the following data:

Name	Status	Worker pool	Zone	Private IP	Public IP	Version
000000016	Provision pendin...	default	Milan 01			1.24.6

Below the table, it shows 'Items per page: 25' and '1-1 of 1 item'. On the right, there is a 'Help' sidebar with links like 'Log in to your cluster', 'Deploy your app', 'Expose your app', 'Add storage to your app', 'Connect integrations', 'Install add-ons', and 'Troubleshoot'. The top navigation bar includes 'IBM Cloud', a search bar, and user information 'Swetha Malya.k's Acco...'. The bottom status bar shows '27°C Mostly cloudy' and the date '07-11-2022'.
